With Trailer

Description

The 2023 Sea-Doo Switch 21 Cruise is built for boaters who want the comfort of a pontoon, the agility of a jet-powered craft, and the freedom to shape every outing their way. With its spacious 21-foot layout, modular deck design, and relaxed cruise-focused seating, it is ideal for family days, social trips with friends, or simply drifting into a quiet cove for lunch. Sea-Doo's intuitive handlebar steering makes it feel approachable and fun from the first trip, while the Rotax jet propulsion system delivers confident performance without an exposed propeller. Whether you are packing coolers for a full afternoon, towing water toys, or enjoying a slow sunset cruise, the 2023 Sea-Doo Switch 21 Cruise offers a clever blend of practicality, comfort, and playful on-water energy.
